Website: www.alusani.co.za

WHAT WE DO

We assist thousands of people every year to meet their training needs with our training solutions. With a diverse Course Portfolio of over 175 courses in 19 different topic areas, all of our practical and hands-on training courses zero in on the most critical information and skills that you need to get ahead and stay there!

We have over the years built a reputation for high-quality business focused training courses that cover every industry and sector. The reason why we have achieved this success is because we conduct market research with training decision-makers and develop each and every training course so that they are designed to meet the actual learning needs and skills gaps of your employees and your organisation.

All of our Course Leaders are subject matter experts in their areas of expertise. We continually evaluate our Course Leader effectiveness based on their ability to create a positive learning environment as well as their ability to transfer meaningful job-related skills to the Course Participants. As a result, Alusani Skills & Training Network's® training is 100% guaranteed!

FULL ACCREDITATION

Alusani Skills & Training Network® has **Full Accreditation** as a Provider of Education & Training for the provision of learning programmes with the Services SETA. Our Accreditation number is 2536. Alusani Skills & Training Network® has successfully passed comprehensive SETQAA evaluation audits of our quality management practices in relation to eight core criteria as specified by SAQA. We offer both short courses and credit-bearing learning programmes.

For more information and documentation on our accreditation status, please contact our QMS Administrator - imogen@alusani.co.za.

MEMBERSHIPS

Alusani Skills & Training Network® is also an Official Member of the Direct Marketing Association SA. We follow the DMA Code of Ethics and Standards of Practice and we are committed to the responsible and ethical execution of all of our direct marketing campaigns. In addition we ensure that all communication with our potential customers is factual, honest, decent and informative and that it does not violate any laws of the country.

CPD ACTIVITIES

At Alusani Skills & Training Network® we offer professionals involved in the engineering, maintenance and construction disciplines on-going access to Continued Professional Development (CPD) through our short courses. Our courses make it easy for anyone involved in the engineering, maintenance, construction or related professions to maintain their professional registration while at the same time staying abreast of developments and advancements within their respective fields of practice.

“Trust the name you know.”

SAICE & ECSA

All of our engineering, maintenance and construction-related courses are accredited through SAICE as they are considered one of the leaders in the field when it comes to the approval of CPD activities. As SAICE is a recognised Voluntary Association (VA) of ECSA, this means that you can be assured that any Alusani Skills & Training Network® training course approved for CPD by SAICE will automatically be accepted by ECSA.

Below is a list of all of our courses currently accredited with SAICE / ECSA.

Advanced MS Project for Construction & Engineering - 2 CPD Points Validation # SAICEcon17/02056/20	Business Development & Project Planning for Construction & Engineering Works - 2 CPD Points Validation # SAICEcon15/01842/18
Construction Contract Law - 2 CPD Points Validation # SAICEcon17/03000/20	Construction Estimating - 2 CPD Points Validation # SAICEcon16/02018/19
Construction Regulations - 1 CPD Point Validation # SAICEcon17/02168/20	Construction Site Management - 2 CPD Points Validation # SAICEcon17/02252/20
Effective Claims Management Under FIDIC Contracts - 1 CPD Point Validation # SAICEcon17/02098/20	Effective Construction Contract Management & Administration - 2 CPD Points Validation # SAICEcon16/01881/19
Effective Project Administration - 3 CPD Points Validation # SAICEproj17/02130/20	FIDIC - 2 CPD Points Validation # SAICEcon17/02099/20
FIDIC - Advanced Contract Management & Administration - 2 CPD Points Validation # SAICEcon17/02057/20	Finance for Engineers, Project & Technical Managers - 3 CPD Points Validation # SAICEbus15/01752/18
GCC 2015 - 2 CPD Points Validation # SAICEcon16/01909/19	GCC 2015 - Risks and Related Matters - 1 CPD Point Validation # SAICEcon16/02025/19
How to Manage Claims Under the JBCC Suite of Contracts - 1 CPD Point Validation # SAICEcon18/02300/21	JBCC N/S Subcontract Agreement - 2 CPD Points Validation # SAICEcon17/02177/20

ASAQS & SACQSP

Alusani® currently has 6 courses accredited with ASAQS. ASAQS provides guidance and resources to succeed in the quantity surveying profession today and in the future and to stay abreast of developments in the built environment. CPD courses assist members to broaden their knowledge base and promote professional growth. As ASAQS is a recognised VA of SACQSP, training courses validated by ASAQS will be accepted by SACQSP.

Construction Estimating - has been validated as a Category One CPD event and carries 13 Hours CPD Credits Validation # ASAQS CPD 2017/009	FIDIC - has been validated as a Category One CPD event and carries 13 Hours CPD Credits Validation # ASAQS CPD 2015/013
How to Manage Claims Under the JBCC Suite of Contracts - has been validated as a Category One CPD event and carries 6.5 Hours CPD Credits Validation # ASAQS CPD 2015/014	JBCC Suite of Contracts – Edition 6.1 – has been validated as a Category One CPD event and carries 13 Hours CPD Credits Validation # ASAQS CPD 2015/011
New Engineering Contract - has been validated as a Category One CPD event and carries 13 Hours CPD Credits Validation # ASAQS CPD 2015/012	Professional Services Contracts & EPCMs - has been validated as a Category One CPD event and carries 13 Hours CPD Credits Validation # ASAQS CPD 2015/018

BELOW IS A LIST OF OUR ACCREDITED TRAINING COURSES THAT OFFER CPD POINTS:

Advanced MS Project for Construction & Engineering

SAICE/ECSA

SACPCMP

2 CPD Points

14 CPD Hours

As a Project Manager involved with construction and engineering projects you are tasked with major decision-making on a daily basis, monitoring of quality and leading your team towards the final end goal, a successfully completed project. MS Project is more than just a software package to manage the schedule of a project but it is a highly effective tool to monitor, control and report your projects progress and if used effectively it can be so much more than this!

So, this 2-day training course had been researched and developed to go beyond simply a mere demonstration of the features and functions to cover in detail MS Project's practical application in a real-world construction and engineering environment. What you learn during this course will be invaluable as it is geared exactly to your unique needs and will show you how to truly unlock the full potential of MS Project!

Business Development & Project Planning for Construction & Engineering Works

SAICE/ECSA

2 CPD Points

Work is so scarce that companies are bidding for 'anything and everything', thinking that if they bid for enough jobs that eventually they'll get their fair share. Sadly, this tactic and effort won't get you the positive results that you want, especially if you are using the same proposal strategies that you've always used. You need to think of this like fishing... you wouldn't use the same bait and tackle to catch salmon that you would use for tuna so why do you try and win construction and engineering works using the same tactics and tired proposals?

Times are changing in the construction industry and you have to change with them if you want to stay a viable and profitable company. So, the million Rand question is how do you change your current business development processes and increase your Order Book?

Bids and their development form the essential make-up of contracts for any construction and engineering project. It is in the bid development phase where the engineering ideas are conceived, developed and translated into the intended products to be constructed. The bid phase is in actual fact where a lot of the business risk resides because it is the precursor to the project execution and construction phase of the project. But with so many companies churning out bids, very few business development managers actually include the project team from the outset – they simply bid and if they are lucky they win the work and then they hand off to the project team and hope for the best...and the last time I checked 'hope' was not considered a business strategy!

The reality is that a thoughtfully planned bid makes for a successful project and this in turn translates into healthy business profits.

In short, this 2-day training course has been researched and developed with one aim in mind to show you how to win more work and also when you should back away from a project because the risks are too high so at the end of the day you make more money!

Using a variety of real-life construction and engineering-focused case studies we will go through each of the modules in detail – this will allow you to get a full understanding of how to apply what you have learnt in a real-world environment.

Construction Contract Law

SAICE/ECSA

SACPCMP

2 CPD Points

12 CPD Hours

What you don't know could hurt you! This comprehensive training course uses real-life examples from actual projects and examines and compares the similarities and differences of the NEC3 ECC, FIDIC Red, Yellow, Silver & White Books, JBCC Edition 6.1 PBA & GCC 2010/2015.

If you are involved in the management of or with the commercial aspects of construction projects then it would be in your best interest to develop and sharpen your knowledge of how the standard forms of construction contracts differ, the law that governs them as well as the legal principles that apply. The reason is that this not only makes good business sense, it is also crucial for a successful project that all team members understand the dynamics of the construction contract, the applicable and relevant legal principles and how it all relates to the parties' contractual and legal rights as well as to an organisation's business goals. So, this training course is one that you simply can't afford to miss as it offers you the very best opportunity to do just that.

This intensive and highly practical 2-day training course will provide you with the most comprehensive, up-to-date and practical advice on the most challenging and critical construction law and construction contract-related issues. The focus of this course is on preventing problems rather than addressing them only once they have arisen. You will learn your rights and responsibilities as defined by the reference to legislation and court cases, as well as how to enforce them. Find out how to avoid unwelcome, project crippling surprises with legally sound contracts. Make sure that you have all of your legal bases covered no matter what type of project delivery method or contract strategy is chosen.

We will also cover in detail the risks and liabilities that you may face on a daily basis. In addition we will take a detailed look at proven ways to avoid and to minimise problems on construction projects, as well as how to effectively resolve disputes and handle any claims that may arise.

Phone: 011 447 7470
Fax: 086 686 8425

Construction Estimating

SAICE/ECSA	ASAQS/SACQSP
2 CPD Points	13 Hours CPD Credits

Construction estimating is not simply number crunching to get a figure. But it is a multi-faceted process that must be followed in order to ensure that all risks are accounted for.

This 2-day training course will look at the very latest principles, practices and techniques for accurately estimating construction project costs regardless of any changes in the cost of materials, equipment or labour.

Construction Regulations

SAICE/ECSA	SACPCMP	SAIOSH
1 CPD Point	6 CPD Hours	2 CPD Credits

In a nutshell the aim of the regulations is to place legal responsibilities on all key stakeholders in the construction industry to address and radically improve health and safety issues on construction sites.

This 1-day training course has been designed to cover in detail exactly how the Construction Regulations affect your business and you will leave this course with a whole new level of understanding of what you need to do to comply, how to apply the regulations in your company, how they will be enforced and a whole lot more.

Construction Site Management

SAICE/ECSA	SACPCMP	SAIOSH
2 CPD Points	10 CPD Hours	5 CPD Credits

Did you realise when you started your career as a Site Manager that you would actually need to be part magician, part musical conductor and part superhero? I bet you didn't!

In short, it is your job and responsibility to make sure that your construction site runs smoothly all the time. The planning and organising of multiple resources and people on any construction site can be extremely stressful. Coupled with that, it is your job to make sure that your projects are completed on time, that they stay within the budget and meet the requirements of the plans and the client...oh yes and that everyone is safe and there are no serious accidents...all of this is a pretty tall order.

But in reality, projects change constantly, sub-contractors foul up the schedule, people don't perform so you have to deal with union issues, it rains solid for 2 weeks so you are behind and everyone goes crazy as chaos reigns...sound familiar? Well no more!

Rather than attending 10 different training courses to tackle each module separately we have pulled together and condensed tons of material to get to the construction site management essentials that you need right now to take your skills to the next level.

Bottom line, the essential construction site management skills that you learn during this CPD-accredited training course will make a significant and immediate impact on your daily productivity.

Effective Construction Contract Management and Administration

SAICE/ECSA
2 CPD Points

This hands-on and practical 2-day training course has been designed to take you through the entire project life cycle and contract administration tasks and it will equip you with the skills you need to determine the inherent risks associated with each stage of the life cycle. You will also learn how to use all of the tools at your disposal to avoid cost and time over-runs, without the need to sacrifice quality.

Effective Claims Management Under FIDIC Contract

SAICE/ECSA
1 CPD Point

Claims often arise on building and engineering projects and appear to be an inherent feature of the industry. Unfortunately claims have acquired a very negative connotation and the manner in which claims are brought and assessed often lead to disputes.

Most building and engineering contracts set out the basis for claims and indicate which events will lead to claims. These contracts also contain and prescribe detailed procedures that have to be followed by the parties should they wish to give notice of and submit claims. FIDIC is no exception!

This 1-day CPD-accredited training course focuses in detail on the grounds to claim and the procedures to notify claims that are applicable in the case of FIDIC contract. We also cover in detail the issue of how to properly present and assess claims.

Plus all Course Participants receive a copy of the FIDIC Red Book valued at over R1000 - ABSOLUTELY FREE!

Phone: 011 447 7470
Fax: 086 686 8425
Email: info@alusani.co.za
Website: www.alusani.co.za

Effective Project Administration

SAICE/ECSA	SACPCMP
3 CPD Points	12 CPD Hours

Simply put, project administration can make or break a project because it is the key to successfully maintaining control on any project. Many projects go off track because of a lack of effective administration. And if like many Project Administrators, you are working very hard and you aspire to eventually move up the ladder and become a recognised Project Manager in your own right...then this training course is exactly what you need. In order to help you reach your goals we have researched and developed this 3-day training course that is jam-packed with tips, tools and strategies that will help you to take control of your workload, manage multiple projects and stay on top of priorities, deadlines and budgets.

Plus each Course Participant takes home a CD-ROM jam-packed with Templates & Bonus Material valued at over R2000 ABSOLUTELY FREE!

FIDIC

SAICE/ECSA	SACPCMP	ASAQS/SACQSP
2 CPD Points	12 CPD Hours	13 Hours CPD Credits

This 2-day training course focuses on the practical use of the FIDIC International Suite of Standard Form Construction Contracts and it has been specifically designed to equip all Participants with a practical and detailed understanding as well as a working knowledge of the relevant legal principles, contractual provisions and management mechanisms which combine in FIDIC's international suite of standard form contracts which will enable the execution of projects within time, to budget and in compliance with your Employer's technical requirements and specifications.

Plus all Course Participants receive a copy of the 2017 FIDIC Red Book valued at over R1000 - ABSOLUTELY FREE!

FIDIC - Advanced Contract Management & Administration

SAICE/ECSA
2 CPD Points

We have designed this training course to take you through the entire life cycle of a project including all of the FIDIC contract administration tasks that you need to be aware of every step of the way. It will also equip you with the skills that you need to determine the inherent risks associated with each stage during the lifecycle of the project.

In addition, this course will explore and incorporate all of the technical and procedural competencies that cover in detail the dealings between the contracting parties and concerned stakeholders no matter if you represent the Employer/Client, Consultant or Contractor. It will also combine both the FIDIC commercial and contractual necessities which will support and promote the performance of the entire project from the time the contract is awarded until the work has been completed, payment has been made and any disputes settled.

Another incentive for you to register for this course - every Course Participant as part of your registration fee will receive your very own copy of the 2017 FIDIC Red Book and FIDIC Yellow Book which are valued at over R2000 ABSOLUTELY FREE!

Finance for Engineers, Project and Technical Managers

SAICE/ECSA
3 CPD Points

Understanding the complexities of finance for engineering, project managers and other multi-disciplinary professionals is a must and this 3-day training course has been designed in such a way to be as practical and interactive as possible. Using a real-life case study will allow you to learn, apply and practice all the tips, tools and techniques you need to positively contribute to the financial and strategic project-focused decisions within your company.

GCC 2015

SAICE/ECSA	SACPCMP
2 CPD Points	12 CPD Hours

General Conditions of Contract 3rd Edition or the GCC 2015 as it is now known is an 'upgraded' version of the GCC 2010.

According to SAICE who publish the GCC, the upgrade was necessary as there were a number of grey areas that needed clarification and refinement and in addition there were also amendments that were clearly needed.

The GCC remains the standard form contract of choice, especially for local Government-run projects.

The reality is that many construction and engineering company order books are at an all-time low. So, when you consider the recent announcement by National Treasury that Government will continue to help municipalities plan and implement urban development projects to the tune of over R229-billion...then I am sure that you will agree with me that local Government projects (albeit in the short-term) are starting to look very attractive indeed.

This is where this training course comes in, as it focuses on and discusses in detail the significant changes as well as the new features of GCC 2015. It has been designed and developed to give you a completely unbiased look at how the GCC 2015 works in practice.

"Trust the name you know."

Phone: 011 447 7470
 Fax: 086 686 8425
 Email: info@alusani.co.za
 Website: www.alusani.co.za

Think of this training course as your essential guide to the GCC 2015 as it will provide you with much needed clarity and detail on everything you need to know in a fast-paced and plain-English way and it is guaranteed to provide a whole new level of understanding to anyone that has to deal with and use this contract on a regular basis.

Every Course Participant gets a copy of the General Conditions of Contract for Construction Works – 3rd Edition 2015 + Guide to the General Conditions of Contract 2015 valued at over R1000 - ABSOLUTELY FREE!

GCC 2015 Risks & Related Matters

SAICE/ECSA

1 CPD Point

If you don't know what the risks are...how can you actually manage them? And if you think about it, if the risks are identified early enough then you can do something about them. Ideally, project risks when you are using the GCC 2015 should be considered from the very first conceptual stages of any project.

The reason for this is simple, because the ability to actually distinguish what are realistic and actual risks that may threaten your project will help you to actively mitigate or manage the root causes before they get out of hand and doing so will also ultimately minimise claims.

How to Manage Claims Under the JBCC Suite of Contracts

SAICE/ECSA

1 CPD Point

SACPCMP

5 CPD Hours

ASAQS/SACQSP

6.5 Hours CPD Credits

SAIAT/SACAP

1 CPD Credit

Sadly with disagreements and disputes on the increase it seems like they are becoming part and parcel of the construction industry. Many of these disputes and disagreements are based on misunderstandings that often relate to the practical and technical aspects of the project. But how do you make sure that this does not derail the entire project? This 1-day training course has been especially formulated to cover all of the bases and increase your knowledge and understanding of all aspects of dealing with:

- Disagreement and disputes under the JBCC Principal Building Agreement and the time-barring provisions introduced by Edition 6.1
- The application of the JBCC Principal Adjudication Rules
- Claims of an on-going nature - everything you need to know about how to preserve your rights in terms of the JBCC Building Agreement
- Reviewing the requirements, merits and demerits of proven alternative dispute

Your registration includes a copy of Edition 6.1 of the JBCC Principal Building Agreement and Contract Data valued at over R650 - ABSOLUTELY FREE!

JBCC N/S Subcontract Agreement

SAICE/ECSA

2 CPD Points

A lot of Subcontractors complain that they are subject to unfair practices and even bullying tactics by some Main Contractors.

That is where this training course comes in as we focus purely on the JBCC N/S Subcontract Agreement and zone in on key contract conditions as well as the rights and obligations of all the parties including how the risks are allocated. We will also cover the administrative requirements, dealing mostly with payments that tend not to be issued within the time limits specified in the contract which in turn often results in a Subcontractor's worst nightmare...late or no payments - sometimes with unfair deductions.

Most training courses give you countless ideas and text book theories that really have no real world application. This course is different and you will instantly build your skills set as you will learn practical tips and techniques that you can use immediately when you get back to work. Using interactive discussions as well as a series of real-life JBCC-focused case studies, you will leave this training course with a clear understanding of all of the parties' rights and responsibilities when executing and performing the JBCC N/S Subcontract Agreement.

We will also cover in detail all of the issues that can arise during the subcontracting process and you will leave the training course with the knowledge and confidence when dealing with these issues in the future, no matter if you represent the Subcontractor, the Employer, Consultants or the Main Contractor.

And as an additional bonus, your registration as a Course Participant includes a copy of Edition 6.1 of the JBCC N/S Subcontract and the Contract Data valued at over R500 ABSOLUTELY FREE!

JBCC Suite of Contracts - Edition 6.1

SAICE/ECSA

2 CPD Credits

SACPCMP

10 CPD Hours

ASAQS/SACQSP

13 Hours CPD Credits

SAIAT/SACAP

2 CPD Credits

This 2-day training course offers you something quite different as it takes a unique and unbiased 360° look at the entire JBCC Suite of Contracts and literally leaves no stone unturned.

In addition a new module has been added and we will spend quite a bit of time taking a detailed look at the new changes/additions that have been included in the JBCC Edition 6.1 and will discuss whether these address some of the areas of criticism previously raised. This will allow for a focussed discussion on the key provisions of the contracts, as well as an objective view of the practical application of the JBCC Edition 6.1 in order to highlight its strengths and weaknesses.

Your registration includes a copy of Edition 6.1 of the JBCC Principal Building Agreement and Contract Data valued at over R650 - ABSOLUTELY FREE!

"Trust the name you know."

Legal Liability

SAIOSH

2 CPD Credits

The reality is that the issue of legal liability keeps coming up and it isn't going away anytime soon!

So, this training course has been researched and developed to answer this simple question asked by construction and engineering professionals on a daily basis, "what is my potential health and safety legal liability in doing my job and what can I do to minimise the risks?"

Maintenance Planning & Scheduling for Improved Reliability & Uptime

SAICE/ECSA

3 CPD Points

During this 3-day course you will learn how current best planning and scheduling practices can be applied and you will also learn how to initiate an effective and measurable maintenance planning and scheduling process.

The methodology used is based on action-learning, so this course is highly practical and interactive in nature. Throughout the course you will learn how to actually apply the tools presented in each module using real-world case study material.

Management & Leadership Development Skills for Women

SAICE/ECSA

2 CPD Points

Attend this dynamic and results focused leadership 2-day training course and you will learn how to:

- Use your own personality and leadership style to maximum effect
- Correctly position yourself as a powerful and effective leader and increase your professional effectiveness
- Deal with diversity in the workplace and learn why this can make all the difference to your career
- Take advantage of your personal communication strengths
- Build and maintain a motivated and committed team
- Establish and project credibility and earn the respect that you deserve
- Quickly and effectively identify, defuse and manage conflict
- Become the type of leader who inspires loyalty and commitment

New Engineering Contract (Black Book)

SAICE/ECSA

2 CPD Points

SACPCMP

10 CPD Hours

ASAQS/SACQSP

13 Hours CPD Credits

Our 2-day practical training course, New Engineering Contract continues to sell out because it has been designed to focus on the provisions of any NEC contract. And it also covers in detail core clauses and then delves into optional clauses which are seen more as those 'bolt-on' clauses that fine-tune the risk allocation under the contract.

During the course we also explore in detail the area of Early Warnings and Compensation Events as these are unique to the NEC3 Family of Contracts.

So, this 2-day training course pulls together all this and much more in terms of best practices as it answers a wide range on ongoing questions often asked by NEC3 users...so when you think about it you really can't afford to miss this training course!

Each Course Participant who attends this training course will receive a FREE copy of the NEC3 Black Book material valued at over R1350!

NEC3 Advanced Contract Management & Administration

SAICE/ECSA

2 CPD Points

This 2-day CPD-Accredited Advanced Course will take an in-depth look at how to effectively administer and manage the NEC3 contract to meet your obligations as well as the specified deliverables during the execution phase of the project.

We have designed this training course to take you through the entire life cycle of a project including all of the NEC3 contract administration tasks that you need to be aware of each step of the way. It will also equip you with the skills that you need to determine the inherent risks associated with each stage during the lifecycle of the project.

Plus each Course Participant receives the NEC3 Black Book material valued at R1350, the NEC3 Engineering; Construction Contract Guidance Notes material valued at R730 and the NEC3 Engineering; Construction Contract Flow Charts material valued at R480 ABSOLUTELY FREE!

"Trust the name you know."

NEC4

SAICE/ECSA

1 CPD Point

In June 2017, the NEC released its next generation of contracts - the NEC4. The NEC is widely used throughout South Africa so why not use this 1-day CPD-accredited training course to learn more about the improvements, changes and new features?

Described by the NEC as an 'evolution not revolution', the NEC4 builds on the success as well as the content of the NEC3 to achieve even further improvements which now reflect procurement and project management developments as well as emerging best practices. So ultimately NEC4 makes additional enhancements to the overall flexibility, clarity and ease of administration of an NEC contract.

With a variety of new features (many of which are optional to allow for greater flexibility) as well as 2 brand new forms of contract, namely the NEC4 Design, Build and Operate Contract (DBO) and the NEC4 Alliance Contract (ALC) the contract aims to provide for an even greater range of potential contract and procurement solutions for Clients who are undertaking projects and works programmes no matter their size and/or type.

We all know that the NEC is used extensively in South Africa, particularly in the public sector as well as in many of the parastatal organisations. Users who are familiar with NEC3 contracts will have no trouble moving to NEC4 and this is because the style, layout, terminology and key project management processes that run through NEC contracts remains the same. However, the changes that the contract brings are substantial and cannot simply be glossed over. So, instead of reading a few things on the Internet and hoping that you have it covered...this 1-day CPD accredited training course will give you an opportunity to quickly get-up-to-speed and explains all of the new features and improvements in one go!

As part of your registration fee you will receive a copy of the NEC4 Black book material as well as copies of the brand new NEC4 Design Build & Operate Contract (DBO) & the NEC4 Alliance Contract (ALC) Material - these 3 contracts are collectively valued at over R4000!

People Management Skills

SAICE/ECSA

SACPCMP

3 CPD Points

18 CPD Hours

As a Manager, your success is measured not only in terms of your individual contribution but by how well you work with and through your team. Ask yourself honestly - are your people skills holding you back professionally?

You have probably seen this situation before...two people with a very similar set of skills and knowledge, but one of them is able to manage people better and the other one's people skills are just simply poor or mediocre at best. Which one gets ahead faster and goes further? Of course you know the answer...there really is no contest! People like to be managed, especially if they are managed well. And the good thing is that just like any other skill, effective interpersonal skills that can help you to manage people better can be learned.

That is why we have developed this intensive yet practical and hands-on 3-day people management skills training course. You will learn the skills needed to understand, relate to and work better with all types of people...even the difficult ones! This training course will identify and build on your existing strengths and capabilities and doesn't try to preach and teach you incompatible skills or the 'right' way to manage.

Preventive Maintenance Programmes

SAICE/ECSA

3 CPD Points

This skills-packed 3-day training course is guaranteed to get you up to speed fast on the latest, most effective preventive maintenance techniques and strategies available. In addition, you'll learn literally dozens of the very latest and best practices in improving your preventive maintenance (PM) practices that will save you time, money and effort along the way.

Bottom line...invest just 3-days in this essential training course, and you'll eliminate unnecessary expenditures, avoid emergency repairs and quick fixes and stamp out waste as you learn how to create additional resources without spending any additional money on manpower!

Professional Services Contracts & EPCMS

ASAQS/SACQSP

13 Hours CPD Credits

There are a variety of PSC contracts available ranging from the NEC Professional Services Contract (PSC), the FIDIC's Client Consultant Model Services Agreement (the White Book), and the contracts published by PROCSA to the CIBD's Standard Professional Services Contract. Deciding which one to use depends on amongst other things the nature of the project as well as the form of construction contract being used.

This 2-day course offers you an opportunity to re-examine old paradigms and to explore new ways of drafting PSCs / EPCM contracts that operate fairly towards both the Client as well as the Consultant without 'Teflon-coating' one party over the other.

Project Management Scheduling & Control for Engineering & Construction Managers

SAICE/ECSA

SACPCMP

3 CPD Points

18 CPD Hours

Project Management is defined as the process and activity of planning, organising, motivating and controlling resources, procedures and protocols to achieve specific goals in scientific or daily problems.

Easy enough to define but in the construction environment it can be exceptionally hard to do! No matter how big or small your construction project is; you need to have a well-thought-out project management plan in place. And although many managers and engineers involved in the construction industry think that they instinctively understand proper project management as well as how to effectively schedule and control all of the aspects of a project, the high number of claims resulting from delays and damages within the industry clearly show that they don't!

This training course has been researched and designed to show you how to use all the very latest project management tools, tips and techniques so that you can create better schedules that improve productivity, save time and simplify all of your construction scheduling activities from the initial planning and scheduling phase to actual schedule development, including updates and the project.

Root Cause Failure Analysis

SAICE/ECSA

2 CPD Points

Traditional maintenance strategies tend to neglect the identification and then the correction of the underlying problem. But if you do RCFA right and you then apply it consistently throughout your maintenance processes it can quite literally save your organisation hundreds of thousands of Rands in maintenance repair costs and downtime!

So this 2-day training course will take a detailed look at all of the tools and techniques associated with a robust RCFA process. You will not only learn the theory but also how to practically implement a disciplined process to investigate, rectify and eliminate equipment failure in your own maintenance environment.

Technical Report Writing

SAICE/ECSA

SACPCMP

2 CPD Points

12 CPD Hours

With the right training, you can produce professional and polished technical business reports that are quick and easy to read and understand.

By attending this 2-day course you'll learn, step by step, how to shape your thoughts and structure, draft and write clear and concise technical reports. So, you recognise that having better technical report writing skills is vital to your career. But you are worried that this is going to be 2 days of boring lectures. Don't worry - unlike other generic courses available, we have gone out of our way to design a training programme that is engaging, interactive but above all else practical!

HOW TO CLAIM YOUR CPD POINTS/CREDITS/HOURS

CPD POINTS

Go to www.ecsa.co.za

- On the homepage:
 - Click on Home
 - Under Maintain Your Registration:
 - > Click on CPD Enquiry
 - > Open CPD Website
- Enter ECSA Registration Number & ID Number
- Go to Category 1
- Please type ALUSANI SKILLS & TRAINING NETWORK
- Once you have entered the name of the provider a list will pop-up and you need to select the name of the training course that you attended
- Then you must click on the validation number and the course will automatically be added to the CPD website under your details
- This means that you have now successfully claimed your CPD points

Please note however that when inputting numbers on the ECSA website that all fields are case sensitive and you need to use the Validation Number and your Registration Number exactly how it has been given to you.
